March 20, 2020 5:36 P.M

Santa Cruz County Health Services has received confirmation that the presumptive positive COVID-19 case is now officially confirmed. The investigation is currently ongoing to identify close contact exposures. The individual is currently recovering at home.

School closures in Santa Cruz County will be extended through April 10, 2020 as ordered by Governor Doug Ducey. Santa Cruz County is working closely with the Arizona Department of Health Services and the Arizona Department of Education to determine what's best for Arizona kids and schools in the face of COVID-19.

Remember that COVID-19 spreads through the air when an infected person coughs or sneezes. Symptoms are thought to appear within 2 to 14 days after exposure and consist of fever, cough, runny nose, or difficulty breathing. Those considered at highest risk for contracting the virus are individuals with travel to an area where the virus is spreading, or individuals in close contact with a person who is diagnosed as having COVID-19.

The best ways to prevent the spread of respiratory viruses, including COVID-19, are to:

- Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then immediately throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces.

Public health officials advise residents that flu and other respiratory diseases are circulating in the community, and are recommending everyone get a flu shot and follow basic prevention guidelines.

If you have recently traveled to an area where COVID-19 is circulating, and have developed fever with cough or shortness of breath within 14 days of your travel, or have had contact with someone who is suspected to have 2019 novel coronavirus, please stay home. Most people with COVID-19 develop mild symptoms. If you have mild symptoms, please do not seek medical care, but do stay home and practice social distancing from others in the household where possible. If you do have shortness of breath or more severe symptoms, please call your health care provider to get instructions before arriving.

For updated case counts and more information about COVID-19 visit Arizona Department of Health Services COVID-19 webpage, for general information call 1-844-542-8201 to speak with a health professional.
